

Brand Reliability

Developed by trustworthy enterprise, NanoTech Services Ltd.

Compact & Simple

Smallest auto tee up system in the world that can be installed in a limited space with a diameter of 200mm and a depth of 150mm.

Economic

Economic solution for range owners with a limited budget for full automatic ball management system.

Convenient

You have only to move a ball from ball tray to the position of tee hole. Then, the ball will be teed up automatically by the sensor. The tee height can be adjusted between 0 to 65mm.

EZ-SHOT Features

- Display shows play time, ball count, tee height
- Communication with front desk enables both price-per-ball mode & time rental mode.

EZ-SHOT Specification

- Weight : 5 Kg
- Tee up cycle : 4 to 4.5 seconds
- Electricity : AC 220V
- Electricity consumption : 15W
